40 YEARS OF RELIABILITY IN CTS PRODUCTS

The history of restoration is the history of CTS.

Since the early 1980s, the years in which the development of excellence in Italian restoration began with the greatest scholars and exponents, CTS has flanked experimentation, welcoming and interpreting scientific and methodological requirements.

This is how we can retrace the stages of CTS history through the encounters and products from which everything was born.

A path that speaks of discovery, trust and reliability.

A journey that starts in 1984 and 20 products and arrives at 2024 with a list of over 7000 references dedicated to the sector.
